

3 Easy Ways to Help Your Family Save Cash

If you're like most kids, you've probably been told many times how important it is to save money. Help your parents in their efforts to save more for school, family vacations and other expenses by adopting the following habits:

- 1** Turn off the lights and any electronics when you leave a room. This will save your parents money on their energy bills.
- 2** Become your parents' personal shopping assistant. Help them cut out coupons and find great deals at the grocery store.
- 3** Instead of paying for streaming services, subscriptions or renting things out, ask your parents if they can take you to the library. There you'll find movies, books and music you can check out for free!
